QUEEN VICTORIA—Pure canary-yellow. One of the freest bloomers. Good for cutting. 25 cents.

SPRINGFIELD—A new Dahlia of my own introduction. It is identical with “Lonsdale” except in two essentials. It has a darker stem and the flowers, instead of being a salmon-colored flower in Lonsdale, in Springfield are a rich amaranthine-red. Its beauty cannot be described. Free bloomer; very pretty. It lasts longer cut than any Dahlia. 25 cents.

See Third Cover Page for These Gladioli Displayed.

*BERTREX, the Beautiful—Lustrous white with pink lining. One of the choicest right at the top of all existing white varieties. Flowers of great substance and of the size and form of America. Increases rapidly, takes up water well and generally make a fine effect. Any one gives their unqualified endorsement. 15 cents each.

*ELECTRA—Very large brilliant scarlet of a bright and pleasing character; with throat is blitcho; one of the earliest varieties. First-class certificate Haarlem and London. 7 cents.

GLORY (Ruffled)—This is the first ruffled Gladiolus that Kunderd produced. The opening buds are of a soft creamy tint, edged with pink, but as the flower expands the ground color changes to rich ivory-white suffused with pale lavender, which is deeper on the edges. The lower petals are buffish, with a pale crimson striping the center; the throat is penciled with buff and crimson. The spike is straight and strong. Flowers large and of graceful form; four to six out at one time. This is the variety that made Kunderd famous. 10 cents each.

*L’IMMACULEE—Undoubtedly the best commercial white Gladiolus in existence. Very tall spike well set with large flowers of great substance. 10 cents each.

LOVELINESS—As its name implies, this variety produces flowers of distinction in daintiness and beauty. The color is of pale creamy tone, soft and velvety. A very perfect spike and one of the finest in the center. The flowers are large and well placed on the spike; and as a major part of these splendid blossoms are open at one time, they make a most decorative effect. 10 cents each.

*MRS. FRANK PENDLETON—The new sensation begun in 1899, with a width of 4inches and flowers everywhere. The petals show beautiful bright rose-pink on a pure white ground, contrasting in a most striking way with the deep rich velvety blood-red blotch on the lower petals. As showy as an orchid. The most perfect and delicate color ever produced when the spikes are cut and carried indoors as soon as the first blossoms open. No grander variety. 10 cents.

*MRS. WATT—Glowing American Beauty shade of wine. A splendid deep cold flower, nearly all flowers open at one time; spike very erect and not too stiff. Very distinct variety. Created a lot of comment at recent exhibitions. 15 cents each.

*PINK PERFECTION—A true apple-blossom pink with masses of flowers. The buds are so many and crowded so close together on the stalk that when it blooms is one mass of light delicate pink. The spike is long and the magnificent texture of blooms make it one of the choicest of the new varieties. 15 cents.

STAR SET OF SIX EVERBLOOMING ROSES
COSTING $1.55, FOR ONLY $1.25. THE SET OF SIX IN 2 YEARS FOR $2.75
See Opposite Page of Cover for These Roses Displayed.

COLUMBIA (H. T.)—This is a new American Rose, grown by the veteran rosarian E. G. Hill. It is a very vigorous grower of a trued pink shade, deepening as it opens to glowing pink. A peculiarity of this variety is that the shades all become more intense until the full maturity of the open flower is reached, and this color is enduring. 25 cents.

KILLARNEY BRILLIANT (H. T.)—The introduction was to be congratulated 16 years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the best of the Killarney types. Killarney Brilliant has the same habit of growth, and the same freedom of bloom as its parent, while the flower is more double. H. T.—A very brilliant pink. Flowers like Killarney but the garden in bright weather is clear pink, and in dull weather almost crimson. Extra. 25 cents.

RED RADIANCE—A grand Rose. 35 cents.

MISS WILMOT (H. T.)—Most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of Roses all the world over. This variety is practically a uniform soft sulphury-cream, with the faintest flush towards the edges. In shape and form a model of perfection, every flower comes perfect and produced with marvelous freedom. A wonderful Garden Rose. Gold medal, N. R. S. 35 cents.

SPECIAL OFFERINGS IN FLOWER SEEDS

These seeds are listed here to draw attention to varieties that are too little known and planted. None of them are strictly new. The trying out of new varieties is one of the charms of gardening. One should try a few new varieties each season, if only for the neighborly visits they entail to see the new plants bloom.

HARDY PERENNIAL ASTERS

These are the wonderful hybrids developed from the wild Aster that grows everywhere in the late fall. These hybrids grow from four to six feet tall; flowers several times larger than the largest wild ones; stocky, branched, a mass of bloom from top to bottom; pure and clear, in all the shades of blue, lavender, pinks, white, and sometimes shades of crimson. These and the hardy Chrysanthemums close the garden season. 10 cents per packet.

CELOSIA CHILDI

CHINESE WOOLEFLOWER.

Plants two to three feet. Blooms start early with central globular head which often reaches the immense size of two feet in circumference. Scores of branches are thrown out, each bearing its ball of rich crimson-scarlet wool. These branches are in turn branched with smaller heads of wool, which with the liveliest green foliage makes a splendid bouquet. The blooms continue un fade until frost. 15 cents per packet.

BOLTONIA ASTEROIDES

Large, daisy-like white flowers, fine for cutting. Companion to the hardy Asters. 10 cents per packet.

COMMELINA SELLOWIANA

Of graceful, trailing habit, fine for baskets and boxes, or for covering the earth under tall-growing plants. In pots will bloom every day in the year, in the garden from May until frost, showing daily scores of large winged butterfly blooms of a dainty blue color. 10 cents per packet.

CONVOLVULUS MINOR

DWARF MORNING GLORY. These are very showy annuals of exquisite colors for beds and borders; fine for rock work. They bloom for a very long period and delight in sun. Mixed colors. 10 cents per packet.

CENTAUREA CANDIDISSIMA

I am so frequently asked for a showy border for Canna and Salvia beds, that I have added this beautiful silvery-leaved Centaurea for the purpose. 10 cents per packet.

CENTAUREA IMPERIALIS

GIANT SWEET SULTANS. One of the finest cut flowers the garden produces. Should be sown at intervals of two weeks all season to keep up a succession of bloom. Long-stemmed, fragrant blooms in sending their orders. Mixed colors. 10 cents per packet.

CARDAHILLA CLIMBER

A distinct new climber, with lacy, lacinated foliage and bright crimson flowers. The blooms are about an inch in diameter, and borne in clusters of seven to ten. In rich soil and a sunny situation will grow 25 feet in a season. Start the seed in the house early and set out when all danger of frost is over. The seed should be soaked in lukewarm water for several hours before planting. Keep the vine well fertilized and watch it grow. 25 cents per packet.

DAHLIA MAMMOTH MIXTURE.

The seed of this mixture is saved from the largest and most double flowers, and of only the choicest colors. No better Dahlia seed is grown than this I offer you. The seed is from the Show, the Cactus, the Peony, and the decorative types. I have seen blooms almost a foot across from this seed, and the colors were from the most delicate to the deepest and richest. Sow indoors very early, and they will bloom before those grown from tubers. As easily grown as Zinnias. 25 cents per packet.

THE CREAM OF THE NEW ROSES

I here offer what is good in the new Tea and Hybrid Tea Roses. To have what is good you must try these Roses. They are the best that England, France, Ireland, Italy, Holland and America can produce.

COLUMBIA (H. T.)—This is a new American Rose, grown by the veteran rosarian E. G. Hill. It is a very vigorous grower of a true pink shade, deepening to a rose color. One of the attractive points of this variety is that the shades all become more intense until the full maturity of the open flower is reached.

COUNTESS CLAN WILLIAM (H. T.)—Flowers very large and full, produced in endless abundance; buds long and pointed, opening to large, full, high centered flowers of great beauty and refinement. Color delicate peach-pink at the base of the petals, which are flamed and heavily edged with deep cherry-red, and of a soft cerise-crimson of color. A charming Rose. Gold medal, N. R. S.

CRIMSON CHATENAY (H. T.)—This is the Crim- son Chatenay, a great Rose. All know the Mme. Abel Chatenay. All, this is a crimson form with all the other good qualities of its parent.

CRIMSON QUEEN (H. T.)—A very strong, upright grower, flower large and full. Color a rich bright velvety-crimson. A grand garden Rose, as it is the largest grower. Very fine.

CRUSADER (New.)—A big, strong-growing variety, robust and rugged in every characteristic. The growth is heavy and the flower stem strong and heavy. Blossoms are full and the flowers are large and double and in color a rich velvety-crimson. A free flowering red Rose that is a wonder. 50 cents.

FLORENCE FORREST (H. T.)—Clear snow-white with a lemon tinge; as the flowers age they become a pure white; the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. I consider it one of the grandest hybrid teas of the bedding. For size and substance has no equal among Hybrid Teas. Is very sweetly perfumed.

FRANCIS SCOTT KEY (H. T.)—It is very fitting that such a fine new Rose should be honored with the name of the author of the "Star-Spangled Banner," and also that it should hail from Baltimore, one of whose forts was being assailed when the inspiration came to the author to write our national anthem. The flowers are from large to very large, with sixty or more petals opening to a high center. The color is a magnificent deep red rose. Wherever it has been staged this Rose has swept all competitors from the boards and secured every prize it has entered for. Grand for the garden.

FRANK W. DUNLAP (New.)—Did you see it at the international Flower Show at New York the past spring? Its record at the exhibition, win- ning silver medal for the best new pink Rose, gold sweepstakes medal for the best seeding in the show, and also, that it should hail from Baltimore, was the finest flower in the exhibition. Claimed to be better than Mrs. Charles Russell. 50 cents.

GROVE DES BELGES (H. T.)—Growth vigorous and free, flowering continuously until late in the season. Buds small, pointed and of elegant form. So vivid colors of carmine and cochineal. Fine for massing and a fine cut flower.

HADLEY (H. T.)—In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well formed. The color has a peculiar advantage for American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself in the thorough trial to be an all-the-year-round forcing variety.

HOOSIER BEAUTY (H. T.)—I use description of E. G. Hill Co.; "If you need a more profitable red Rose, look no further, the one you are growing. 'Hoosier Beauty' is your variety. It is as fragrant as Rich- mond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ship well in the close-cut state, and opens into a magnif-ictim bloom, quite dazzling in velvety brillance. As soon as the flowers are thoroughly established this sort out long, stiff growths with a bud on every shoot."

KILLARNEY BRILLIANT (H. T.)—The intro- ducers are to be congratulated sixteen years after the advent of Killarney in giving us this distinct novelty. It closely resembles the parent Killarney type. Killarney Brilliant has the same habit of growth and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and dull weather a delicate rose. Is a grand Rose and one of the most brilliant of all the Hybrid Teas.

LADY PLYMOUTH (T.)—The color is a pearly, delicate but deep ivory-cream, faintly flushed, giv- ing it a most piquant finish that is difficult to de- scribe. Awarded a gold medal National Rose Society of England, and silver medal at Crystal Palace Show, London.

LADY ROBERTS (T.)—The color is a rich golden-yellow; very free bloomer and a grand garden Rose.

LILLIAN MOORE (H. T.)—No Rose ever has been offered to the public with the same warm- ing won in strenuous open competition with Roses from all countries of the world the much-coveted One-Thousand-Dollar award in the competition for "Best Hybrid Tea Rose" at the Panama-Pacific Exposition for the best new seedling Rose not in commerce, and named "Lillian Moore" in honor of the wife of the president of the expo- sition, Mr. Charles C. Moore. Color deep pure Indian-yellow with slightly deeper center; long buds; free bloomer.

LOS ANGELES (H. T.)—Los Angeles is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continu- ous succession of long-stemmed flowers of a luminous flame-pink toned with coral and shaded with translucent gold at the base of the petals. In rich- ness of fragrance it equals in intensity the finest Marsha, and the color is a unique form of the Carolina rose. It is a grand garden Rose and one of the most magnificent of all the Hybrid Teas.

MADAME COLLETTE MARTIN (H. T.)—A vig- orous grower of coppery-orange color. The color is very free, and holds well, which can be said of few yellow sorts. For cut flowers, free in bloom, and those wanting a yellow different from "Ward" or "Sunburst" should try this one.

MADAME BUTTERFLY (New.)—Is Hill's glor- ious sport of Ophelia. Seen and admired by thou- sands. All the color tones of Ophelia are intensi- fied, making it a harmony of bright pink, apricot and gold. It is a unique color and Madame Butterfly will surpass it. It averages more petals to the bloom; it produces more bloom to the plant; it is graceful. Every one, even one carrying a bud. The tight buds are a lovely shade of Indian oak, yellow at the base; they are unique for corsages and for large table decorations; the opening flowers are perfect in form and texture, clear and brilliant in color and of delicious frag- rance. 50 cents.

MISS JESSIE M. GOOD. FLOWERS AND SEEDS, SPRINGFIELD, OHIO
THE CREAM OF THE NEW ROSES—Continued

MADAME MARCEL DELANNEY (H. T.)—A surprisingly beautiful novelty raised by the introducers of the popular Rose Jonkheer J. L. Mock, and honored with the award of the Gold Medal of the Bagatelle Gardens at Paris, 1916. It is distinct and peculiar in color, a pale soft pink or rose shaded with hydrangea-pink. The flowers are very large, full and fragrant, perfect in form, and borne on rigid stems. The growth is vigorous and very floriferous.

MISS WILMOT (H. T.)—The most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of Roses all over the world. The color is practically a uniform soft sulphur-cream, with the faintest flush towards the edges. In shape and form this Rose is a model of perfection, every flower comes perfect and produced with a freedom that is marvelous. A wonderful garden Rose. Gold medal, N. R. S. 35 cents.

MRS. CHARLES BELL (Pierson, 1918)—This new Rose will appeal to those who grow Roses out of doors. It may be described as a shell-pink Radiance, and is a sport of that well-known Rose. It has no characteristics which make it distinct from Radiance except that it is shell-pink. Mrs. Chas. Bell, Red Radiance and Radiance offer a range of color that will be welcome, and there are no finer garden Roses for America than these three.

MRS. CHARLES RUSSELL (II. T.)—This wonderful new American Rose has taken the country by storm. No other forcing Rose except “American Beauty” can compete with it when it comes to counting points. Stems three feet long, stiff and surmounted by grand rosy-pink blooms of the largest size and build. 35 cents.

MRS. HENRY WINNETT (H. T.)—This is a seedling raised by Wilmot, of Canada, and has the distinction of being the first seedling Rose of Canadian origin that has been offered in commerce. In color, it is a bright shade of crimson, not so dark as Hadley, and not so light as Richmond. It is a color that pleases the retail storeman and his patrons. The finest of all the red or crimson varieties. The buds are long and well formed. A superb red Rose. 35 cents.
THE CREAM OF THE NEW ROSES—Concluded

PILGRIM (New.)—In color, a beautiful shade of bright rose-pink. The bud, which opens perfectly, is long and of ideal form. Pilgrim is a Rose of good substance and petalage, and at any stage of development is perfect in color and form of flower. Its pronounced tea fragrance will attract all Rose lovers. It is prolific and highly productive of first-quality blooms. The stems are straight and strong. It is the pink Rose to grow. 50 cents.

PREMIER—This is the long-looked-for deep Rose for the garden; a beauty, and one you will be pleased with. It is a very free bloomer, almost smothering the plant. The growth is all that is to be desired, and altogether a wonderful Rose. 50 cents; 2-year plants, $1.00.

RED RADIANCE (H. T.)—All who know that grand Rose Radiance will welcome this red form of that great favorite. Radiance is a Rose that does well everywhere, a fine grower and free bloomer, and no prettier pink Rose grown. Red Radiance is its exact counterpart except that the color is a rich deep red.

ROSE MARIE (H. T.)—This is a grand Rose of the very highest merit. A rich red that has come to stay. Might best be described as a bright watermelon-red. Very desirable.

TIPPERARY (H. T.)—In color stands between Lady Hillingdon and Melody, showing an attractive shade of soft golden-yellow in the bud and half-developed flower is bright almost attractive. The growth will make it one of the most desirable Roses of its color.

THE "EXCELSIOR" LIST OF EVER-BLOOMING ROSES
New and Choice for Outdoor Planting or House Culture

Price, 20 cents each; any six for $1.00. If you leave the selection of the varieties to me, I will send seven for $1.00. Large 2-year-old Roses from this list, 40 cents each, or three for $1.10.

For general planting, more especially in open ground, this class excels all others. One-year-old plants, such as I send by mail, bloom the first and each succeeding year from early spring until severe frosts. Two-year-old plants, of course, yield a greater profusion of flowers, owing to their size. The flowers are noted for their exquisite coloring and delightful fragrance; hardly anywhere in open ground with protection of litter, leaves, evergreen bushes or similar materials. Plant liberally of 1-year-old Roses; the harvest of bloom they give the first year compensates for the trifling outlay. Any one can succeed with them.

ERNA TESCHENDORFF—Deep crimson, flushed with carmine; very dark.

JESSIE—Bright cherry-crimson; superb.

LE PONCEAU—Dark red in large clusters.

MADEMOISELLE CECILE BRUNNER—This is the popular Baby Pink Rose. In the past year or two this Rose has fairly jumped into popularity. It always was a popular outdoor Rose on the Pacific Coast, but recently even in the effete East and everywhere in America they are planting it simply by thousands for cut flowers. It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds, and combines in beautiful effect with so many other flowers in all kinds of work. It is a very prolific bloomer and if carefully protected in winter should be a money-maker, both outdoors and under glass. Bud and flower are both handsome. Color blush, shaded light salmon-pink; distinct and desirable.

MRS. WM. H. CURTIS—Flowers the delicate pink of Dorothy Perkins.

PERLE D'OR—Coppery-orange, changing to fawn.
NEW POLYANTHA, OR BABY ROSES

PRICE, 25 CENTS EACH; 2-YEAR-OLD PLANTS, 60 CENTS.

BABY DOROTHY—This is a glorious Rose. Flowers resemble the Dorothy Perkins. Completely hides the plant with its bloom.

BABY ECHO—The best Polyantha produced. Color rosy-flesh color. Of splendid strong growth and freedom of bloom, which are of wonderful keeping quality. It has the beautiful light pink of the proved Baby Tausendschoen. It has more substance and more color, and is the best of all Baby Roses. Try it. It is beautiful.

BABY TAUSENDSCHOEN, OR THOUSAND BEAUTIES—Its flowers are large, so much like Thousand Beauties that it has been rechristened Baby Tausendschoen. It is a bush form of the Thousand Beauties, having all the charm of the variable coloring in its flowers that its parent has, being firm, white, delicately flushed pink, changing to deep rosy-carmine. A splendid Rose. Try it.

EDITH CAVELL—Bright crimson; white eye; very beautiful.

ETOILE LUISANTE, OR BABY HERRIOT—Just picture to yourself the Fairy or Sweetheart Rose ("Cecile Brunner"), colored up like the Daily Mail flower. It is the Edward Herriot's, only brighter and more brilliant than when that variety is at its best, and you will have some conception of the beauty of this little girl. The substance and richness of color, of this variety in color, has been known among the cutflower trade as Baby Herriot. Its color is a shrimppink with intense coppery-scarlet suffusion, the base of the petal which intensifies as the flower lightens up its high colors. The plant is of free growth and floriferous. I am certain that Baby Herriot will be a very one.

GEORGE ELGER—A lovely little golden-yellow Polyantha Rose, with a good admixture of Tea blood; like all of its class, it is free in growth, free in bloom, with small, glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular crapey variety; is grown in quantity now for this purpose.

“FAMOUS” Rose Collection for Garden Planting

I guarantee that no better Twelve Roses for the garden were ever offered than this "Famous" Collection. Try them.

PRICE, 25 CENTS EACH; THE ENTIRE TWELVE FOR $2.50; 2-YEAR-OLD PLANTS, 50 CENTS EACH; THE ENTIRE TWELVE FOR $5.00.

ANTOINE RIVIÈRE—This is the famous Mrs. Taft Rose of the fashionable Eastern market. This Rose is in a class by itself; no Rose ever produced has such substance of petal; color creamy-white, color of strong substance, and free in bloom. This is a large, strong, imposing Rose, the most beautiful of its kind. It is free in growth, free in bloom, with small, glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular crapey variety; is grown in quantity now for this purpose.

BESSIE BROWN—A Rose of transcendent beauty; of the largest size; color pearl-white, with a delicate tinge of fawn.

ETOILE DE FRANCE—For the best red garden Rose it lies between this one, Rhea Reid and Helen Gould. Some say one and some the other.

ETOILE DE LYON—Still the best large golden-yellow Rose.

HELEN GOULD—A rich red Rose that is a great bloomer. The shade of red has been described best as a watermelon-red; elegant.

HELEN GOOD (The Beauty Cochet)—What the introducers say; this is a very good Rose. It has been put to the test after two years' trial in the garden we pronounce it as good if not better than any Rose for the garden ever sent out. We bought the entire stock of this Rose, paying $1,000 for two plants, this being by far the highest recorded price ever paid for any Rose. The color is a delicate yellow, suffused with pink, and the substance and richness of color is simply delightful. The color, with its immense size and exquisite form, makes it without question the greatest Tea Rose ever introduced, and we are proud to have brought this new Wonder to you.

KAISERIN AUGUSTA VICTORIA—A grand white garden Rose that has stood the test of time. Full and double; fine buds and flowers. A strain of pure Perpetual.

LA FRANCE—This is claimed by many to be the queen of all the Roses; bright silvery-pink.

MAMAN COCHET (The Queen of All Garden Roses)—A Rose to be cherished by every lover of Polyantha Roses; one of the very rare and valuable Roses. The beauty of this variety is well-nigh marvelous, and cannot be seen in any other Rose I know of. The buds are beautiful, and the flowers, when out, are beautiful. They have a very sweet, fragrant perfume. The foliage is narrow, long, and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll roses, a bunch of "Baby Doll" being an even parterre of delicious color.

MAMAN COCHET (No Finer Rose Than This)—This Rose attracted my attention from the very first, and I ever saw it in flower. It is of the largest size, and as you will notice, the flower is built up, or rounded, and very double. The color is a pure and clear white, and blended it is tinged pink, which only adds to its great beauty. No Rose surpasses it in vigorous growth and in immense size of its buds and flowers—and indeed, nothing in the entire family approaches it in size. Delicately fragrant.

WM. R. SMITH—This Rose has several names, such as Charles Dingee, Jeanette Heller, Maidens' Blush, etc. Color delicate blush. It has no superior as a garden Rose.

FREE GREETING OF AACHEN—Yellowish-rose colored with salmon-pink and red shadings; full, strong, for blooming and decoration of modem groups. Owing to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, bright masses.

OKEANS—The showiest and prettiest of all the Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink, with distinct showy center of pure white; florists not crowded, but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. The color is irresistible. The plant grows like a weed and the flowers are nearly "immortelle" in their lasting qualities. I believe that they will outlast almost this Rose. Rose by its long, slender, cut-thrush-like texture. This pretty Rose has taken Europe by storm and is making a sensation in this country.

AWARDS—A chocolate gold medal.

ROSARIE, OR PINK THOUSAND BEAUTIES—This is a bright pink form of that famous Rose, Thousand Beauties. A grand Rose from any standpoint.

TIP TOP ("Baby Doll")—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll roses, a bunch of "Baby Doll" being an even parterre of delicious color.

WHITE AMERICAN BEAUTY, or FRAU KARL DRUSCHKI—This grand white Rose has become renowned as the very highest type of its class and the best snow-white Rose ever introduced. It is an extraordinarily strong grower, and has the vigor and hardness of an oak. Its magnificent flowers are nothing less than glorious—immense in size and produced with great freedom. Color is a marvelous white, without a tinge of yellow or any other shade. A true paper-white, the standard by which all white Roses are judged. I grow “White American Beauty” by the thousands. 40 cents; 2-year plants, $1.00.

**THE NEW HARDY CLIMBING ROSES**

**HARDY EVERYWHERE**

**ALIDA LOVET**—Both buds and flowers are large, are of ideal form, are held on stiff stems a foot and a half to two feet long, and the color is a lively bright shell-pink with shadings of rich sulphur at the base of petals—a combination that is both novel and beautiful. The flowers are of remarkable substance and long lived, whether cut or left to remain upon the plant, and are pleasantly perfumed. It is very much brighter and more cheerful in color with larger flowers than those of the justly popular Dr. Van Fleet Rose. 25 cents each.

**AMERICAN PILLAR**—The flowers are of enormous size, 3 to 4 inches across, of a lovely shade of apple-blossom pink, with a clear white eye and cluster of yellow stamens. These flowers are borne in immense bunches. They last in perfection a long time, and are followed by brilliant red hips or berries, which are carried late into the winter. 25 cents; 2-year plants, 60 cents.

**BESS LOVETT**—Resembles Climbing American Beauty in shape of bloom, but is very much brighter in color and much more fragrant. The flowers are clear, bright red, of good size, and of double, full, cupped form, lasting a long time in good condition. Beautiful in bud and bloom and the most fragrant of the Climbing Roses. A vigorous grower and free bloomer. The large glossy foliage, like that of Silver Moon, greatly enhances the beauty of the flowers. 25 cents each.

**CHRISTINE WRIGHT** or **PINK CLIMBING AMERICAN BEAUTY**—This is identical with the Red Climbing American Beauty described next below this variety; flowers four inches in diameter; color bright, clear pink; immense. Try it; a fine companion for Climbing American Beauty. 25 cents; 2-year plants, 60 cents.

---

**CLIMBING AMERICAN BEAUTY**—Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms three to four inches across; has proven perfectly hardy and stands heat and drought as well as any Rose in my collection. 25 cents; 2-year plants, 75 cents.

**GARDENIA** (The Hardy Marechal Niel)—This grand Rose has proven itself hardy in Virginia and Tennessee. It is a deep golden-yellow of the largest size. 25 cents; 2-year plants, 60 cents.

**GOLDFINCH**—A deep golden-yellow climbing Rose, called by some the Yellow Thousand Beauties; a glorious Rose. 25 cents; 2-year plants, 60 cents.

**MISS HELYETT**—This is the first climbing Rose to flower, and one of the most easily grown. When established, it sends out long, thick growths, quickly covering the space desired. The foliage is not large, but being dense and intensely green, makes an ideal background for the wonderful profusion of flowers. There is such an uninterrupted succession that for almost a month this Rose is the glory of the garden. The bud is short and round and very deep pink veined red and opens to a very full rose with reflexed petals of a blush-pink with a suspicion of yellow mingled in, and measures about 3 inches across. In every way this Rose is worthy of the highest recommendation, as it occupies a prominent position in the Rose world. 50 cents each.
THE NEW HARDY CLIMBING ROSES—Concluded

PAUL'S CARMINE PILLAR—The earliest of the Climbing Roses to come into flower. Color a rich rosy-carmine with white eye. 25 cents; 2-year plants, 60 cents.

PAUL'S SCARLET CLIMBER—The flowers of this superb Rose are vivid scarlet, shaded with bright crimson. A gold medal Rose of England. A new shade in Climbing Roses. 35 cents; 2-year plants, 75 cents.

RED DOROTHY PERKINS, or EXCELSA—The defects of Crimson Rambler are its unsightly foliage in unseasonable weather and its defoliation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces large clusters of flowers. The color is intense crimson-maroon, the tips of the petals being tinged with scarlet. The finest of all red Climbing Roses. 25 cents; 2-year plants, 60 cents.

SHOWEER OF GOLD—This variety produces masses of flowers in large clusters. The color is a deep golden-yellow, with orange shadings in the center. Enormous lateral branches are produced, which are densely clad with glossy green foliage that resists disease. This fills the "long felt want" for a hardy yellow Climbing Rose. 25 cents; 2-year plants, 50 cents.

SILVER MOON—Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness. Flowers are borne on strong stems twelve to eighteen inches long, and are delicately scented. The plant is a strong grower, with large, glossy, bronze-green foliage. 25 cents; 2-year plants, 60 cents.

TAUSENDSCHOEN, or THOUSAND BEAUTIES—A Climbing Rose that comes to us from Germany. The flowers upon first opening are the most delicate shade of pink ever seen in a Rose; might be described as a white delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring. This Rose is sweeping the country like a prairie fire. 25 cents; 2-year plants, 60 cents.

VEILCHENBLAU (The Wonderful New Blue Rose)—This is a Rambler, and will thrive anywhere, being perfectly hardy. It has created a great stir in the Rose world, for the talk of a Blue Rose has been going on since time immemorial. It first opens a pink color, quickly changing to a decided violet-blue. When the plant is in full bloom it presents a startling effect. 25 cents; 2-year plants, 60 cents.

BEAUTIFUL HOUSE FERNS

There are no plants grown that are more desirable for the house than the following fine decorative Ferns. They are easily grown, free from insects and disease, and thrive well in the ordinary temperature of the living room. See that the plants have plenty of drainage and are kept well watered; never let dry out for any length of time. Every one of these Nephrolepis Ferns is entirely distinct in every way. That I am headquarters for Ferns is evidenced by the choice assortment that I offer. No other firm offers so many distinct and choice varieties. Try me for Ferns.

New Fern “Liberty”

This is my own production. In the past I have sent out Baby’s Breath, Teddy Junior and Roosevelt, the three greatest Ferns today, acknowledged so by all plantmen and flower lovers, and now I add another one to the galaxy, “Liberty,” no doubt the best of them. All the fronds have finely divided pinnae that give them a very beautiful appearance, while the whole plant is overlaid with a bluish cast that makes of it a very striking object. Wonderfully beautiful, different from all other Ferns. First time offered. Fine young plants, 50 cents; strong plants, $1.00. Be sure to try this beautiful Fern.

The “Teddy Junior Fern”

Nephrolepis Teddy Junior

“Teddy Junior,” the Fern for every household. This grand Fern was introduced recently by G. & R. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shape-ly, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. “Teddy Junior” will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot. Fine young plants, 35 cents; strong plants, 75 cents.
The “Newport Fern”

Nephrolepis Splendida

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a “Boston,” the wave effect of a “Roosevelt,” the fluffy effect of an “Ostrich Plume,” and the uniqueness of a “Fish Tail.” Some fronds will be straight “Boston,” others will be true “Roosevelt,” in others the ends of the pinnae will be the feathery “Ostrich Plume,” while in others the ends of the pinnae will be the genuine “Fish Tail.” Then again some fronds will have in a marked degree all of these desirable traits, forming a combination without parallel among Ferns. It well deserves the name of “Big Four Fern.” Every one who sees it goes “daisy” about it. This is without question the most splendid of all the Nephrolepis. Be sure to try it. Fine young plants, 35 cents; strong plants, 75 cents.

The “Parlor Fern”

Nephrolepis Whitmanii Compacta

This is a condensed form of the “Ostrich Plume” Fern, with valuable characteristics added, which are not evident in the parent, the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed into one. Graceful beyond description. Fine young plants, 35 cents; strong plants, 75 cents.

The “Boston Fern”

Nephrolepis Bostoniensis

In the vicinity of Boston no other plant is so extensively used as this graceful Nephrolepis, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared with the Ostrich Plume Fern, as they are of an entirely different growth; both have their place and both are beautiful and decorative. Fine young plants, 30 cents; strong plants, 75 cents.

The “Roosevelt Fern”

Nephrolepis Roosevelt

It is my good fortune and great pleasure to offer this wonderful new Fern, having introduced it in 1910. In this short time it stands second in popularity of all the Ferns, and will soon be more popular than even the old favorite Boston Fern. In general characteristics it resembles the world-famous Boston Fern, but it will sweep that Fern from the boards for two reasons: it produces many more fronds than the Boston, thus making a bushier, handsomer plant; then the pinnae are beautifully undulated, giving the “Roosevelt” a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. A charming and most notible variety. Fine young plants, 35 cents; strong plants, 75 cents.

The “Crested Fern”

Nephrolepis Scholzeli

The fronds are crested and stand erect, with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or decayed. The smallest sizable plants perfectly express the type, and in every size are models of beauty for table decorations. Fine young plants, 30 cents; large plants, 75 cents.

The “Newport Fern”

Nephrolepis Scottii

Of much dwarfer habit and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and heavy as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. Fine young plants, 30 cents; strong plants, 75 cents.

The “Wannamaker Fern”

Nephrolepis John Wannamaker

A new Fern of wonderful beauty. Long, narrow, gracefully drooping fronds. It is not so compact as Escholzeli, and, therefore, is a very airy and graceful Fern, and very durable in the house. A rapid grower; quite distinct from other Ferns. Fine young plants, 30 cents; strong plants, 75 cents.
The “Philadelphia Lace Fern”
Nephrolepis Elegantissima
The small size pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description. Fine young plants, 35 cents; strong plants, 75 cents.

The “Old Original Sword Fern”
Nephrolepis Exaltata
This is the “old original Sword Fern,” the “daddy” of them all, the one plant from which all the Nephrolepis I offer sprang. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. Fine young plants, 25 cents; strong plants, 75 cents.

The “Baby’s Breath Fern”
Nephrolepis Goodii
This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, “Call it the Baby’s Breath Fern, as it is so dainty in texture that a baby’s breath would set its fluffy foliage in motion.” The fronds are very fine and fliny, on which account it has been called by some the Lace Fern. It is an improved variety, and the best of its type. Nothing is daintier or more exquisite than well-grown specimens in any size. My reputation for it that no Fern in existence can compare with “Baby’s Breath” in fluffiness. It gives the impression of fine lace work, and has been named in the East the Philadelphia Lace Fern. No one can make a mistake by growing this dainty Baby’s Breath Fern. Fine young plants, 50 cents; strong plants, $1.00.

“Ostrich Plume Fern”
Nephrolepis Whitmani
A great Fern. In fact, it is a plant that appeals to every one, and on that account will prove a much more valuable and profitable plant than other Ferns of this class. Every one who has seen it is charmed with it. As some one has expressed it, “There is nothing like the Ostrich Plume Fern in cultivation. In decorative effect it so far outdistances the original variety that there is positively no comparison to be made. We consider it the most valuable novelty that has been introduced in many, many years.” It has taken gold medals wherever shown. Fine young plants, 35 cents; strong plants, 85 cents.

“Fluffy Ruffles Fern”
Nephrolepis Superbissima
This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern; its dense growth much more compact, and its irregular shaped fronds, which give it the name of “Fluffy Ruffles Fern.” The fronds are very heavily imbricated, the pinnae overlapping, and are so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit and the fronds firm and rigid, never break down, so that it will stand more knocking around than any other Fern. Fine young plants, 75 cents.

Dwarf Ferns for Fern Dishes
I have selected a few of the hardiest and most satisfactory varieties for filling Fern Dishes, than which there is no prettier table decoration for winter. Price, 15 cents each; five distinct Dwarf Ferns for 60 cents.

SPECIAL OFFER
The Fourteen Beautiful Ferns as named, costing $5.50, for only $4.50. The Thirteen Ferns in strong plants, costing $10.50, for only $8.00.
GLADIOLI

Their easy culture appeals to all, and the freedom from disease and insect pests is another great asset. They associate so well with all garden flowers, but above all the decorative possibilities both as a cut-flower subject and also in the garden. The collection I offer here is unsurpassed and will be a source of great delight to all who plant them. The flowers last a long time when cut. Do not be stingy in planting Gladioli, but plant by the dozen, or even by the hundred. Varieties marked with an asterisk (*) are particularly fine for forcing. MAINE (Vos)—A variety long looked for by both florists and grower. Its color is pure white; not the faintest spot or bluish tint can be traced on petals, throat, blooms, leaves or stem. The color of the petals backward, reminding us of the lovely form that characterizes the Easter Lily. There are many new varieties of Gladiolus, but these soms, correctly placed on the stem, widely expanded, tend to touch each other in the acme of blossoming, giving the impression as though this full row of flowers were not one but two. The flowers were one long pyramidal flower. Unlike so many white Gladiolus, Maine is an extremely strong grower and rapid multiplier. This first sort, which is the best single spike of such flowers, or three robust spikes with deep green, healthy foliage. In conclusion, I wish to state that Glad. Maine makes a charming bedding between Glad. Europa and Glad. Lily Lehman. $4.00 each.

Diameter and spikes four to five feet high. 75 cents each; $7.50 per dozen.

MURIEL—The most delicate shaded grayish-blue with eight to ten very fine formed flowers open at one time on a slender stalk, exceptionally placed. This is without question the very best blue Gladiolus to date. The color is so pleasing and the refined grace of the flower so enchanting as to please everybody. An extra choice and rare variety. $1.00 each; $10.00 per dozen.

MYRTLE (Kunderd)—The most beautiful pink yet produced in Gladiolus. Clearest dainty ruffled rose-pink, softly dissolving into a throat of clear creamy-white, its cool angelic beauty is most enchanting; in the straight spikes, the opening buds very closely resemble creamy-pink tinted rosebuds with slightly flaring petals. “Myrtle” stands among the very elite of “Wizard” Kunderd’s many exquisite productions. 15 cents each; $1.50 per dozen.

*PINK PERFECTION—A true apple-blossom pink with immense flowers. The buds are so many and crowded so close together on the stalk that when it blooms it is one of the most beautiful pink. The wonderful improvement made during recent years in these old-fashioned hardy plants has brought them into renewed popularity. The gorgeous flowers, which rival the finest Roses in size, form and color, are produced in great abundance. After once being planted they require little care and attention, thrive evenly in the coldest climates; each year after planting they grow into greater value, producing more and more flowers. They are not troubled with insect pests. Try some of my fine Peonies, and see what grand flowers they are. Get it out of your head that there are only Red, White and Pink Peonies to illustrate at flowering time. People who visit my field will say, "I have Pink and White Peonies. I have Red ones," but when they are shown the Pink and White, they invariably exclaim, "How grand! I have none like them." There is as much difference in Peonies as there is in Roses.

TIME TO BUY PEONIES DURING THE FALL SEASON

The proper time to buy and plant Peonies is from September 1st until the ground freezes up. The plants I offer are field-grown divisions with two to five or more eyes, commonly known as one-year plants.

SPECIAL COLLECTIONS OF PEONIES

To those who do not care for the nomenclature of the Peony, I have made up several collections, and here offer them as an aid to making selections. Patrons will find these varieties embrace a wide range of color and form, and are exceptionally meritorious.

"PEONIES FOR PLEASURE"

This book of "Peonies for Pleasure" gives you information on "Peony History," "Nomenclature," "Six Points of Excellence," "A Month of Peonies," "The Lure of the Peony," "An Appreciation," about Peony culture, soil, drainage, fertilizers and how to apply; planting time and how to plant; varieties for cut flowers; how to grow exhibition flowers. This book describes over two hundred of the choicest kinds. If you want information on the plant that stands next to the Rose in beauty, that is practically known to the amateur as simply a red, white and pink Peony, then send today for "Peonies for Pleasure."
THE CREAM OF THE PEONIES

You may order by the number preceding the varieties or by name, or, better still, in ordering use both numbers and names and send in order for your booklet, "Peonies for Pleasure." It is mailed free. It also describes and prices over a hundred other choice kinds, both new and old, that are not named in this catalogue. Send for it today. All Peony roots here offered are known as Divisions. If you want larger roots send to me asking for my prices on one, two and three-year roots.

Pansy Geranium, Mrs. Layal

A Wonderful Plant

This new and wonderful Pansy Geranium is of the easiest growth, dwarf in habit, and literally covered with flowers all the time; and as it requires little or no attention, it is invaluable as a window plant. The coloring and markings of the flowers are most extraordinary—light pink, white, dark purple, black, etc., almost rivaling the Pansy in uniqueness of flowers. It is this combination of coloring which obtained for it the popular name of Pansy Geranium. Strong plants, ready to bloom, 30 cents each; two for 60 cents.
The grandest of all flowering plants; do not resemble the common Geraniums in any particular, neither in foliage nor flower; more beautiful in every way. I here offer six distinct sorts, every one entirely different in color and every one a beauty. The Lady Washington Geraniums are the handsomest of all flowers—once seen, never forgotten.

**THE EASTER GREETING OR EVER-BLOOMING SET**

**PRICE, 40 CENTS EACH.**

-EASTER GREETING—Planted out as a bedding plant, it will bloom continually until late in the fall. It will prove the forerunner of a new race of ever-blooming kinds, as it rivals the Orchids in beauty. This new species is the earliest of all Pelargoniums, with enormous florets and clusters, having light green foliage and of dwarf, robust growth. It blooms from March until fall. Florets fiery amaranth-red, with five large, regular shaped spots. The first and only kind to bloom as well bedded out as in pots, and to do so all summer.

-GARDENER'S JOY—The ground color is apple-blossom pink, the two upper petals have blotches of carbon-brown, the lower are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and re- mind one of a Rhododendron cluster. It is of a half-dwarf nature and varies in color from its rapid, luxuriant growth it is a very profitable market variety.

-GOLO—This splendid novelty is quite remontant, flowers and cluster very large; ground color, Cattleya-blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red, spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniums. This kind will rival a very robust growth.

-LIBERTY—A glorious flower of salmon-red, with large velvety, sharply defined blotches bordered with scarlet. Has all the good qualities of Easter Greeting, its parent, having gigantic trusses. Equally valuable as a pot plant or for bedding out.

-LUCY BECKER—This grand novelty is a sport of Easter Greeting, and is like it in everything but color, which is a rosy-pink. It is, if anything, even more free in bloom.

-PRINCE—Immensely large flowers, strongly crimped, of fine shade, with from six to ten petals; color rich purple with velvety-black blotches. Remarkably robust habits and large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

**BEAUTIFUL CANNAS**

Cannas are called the poor man's Orchid because one may possess a perfect riot of color in his yard or garden for the minimum of both outlay and labor. They grow rapidly and bloom luxuriantly throughout a long season, requiring merely ordinary hoeing and weeding, and they always respond to plenty of water. Soak the ground thoroughly. Planted in beds of any formal shape, in rows or in front of porches and foundation walls, their rich, tropical foliage and gaudy bloom will repay their care and the insignificant trouble of winter storage.

**Novelties in Cannas and Those That Are Rare**

-FIREBIRD—The best red-flowered Canna; gigantic trusses of immense flowers with petals two and one-half to three inches and over across. Color clear, glistening scarlet without streaks or spots of any kind. 35 cents.

-METEOR—Immense trusses of large, rounded flowers, well displayed above the massive foliage; brilliant crimson. 50 cents.

-PANAMA—An attractive rich orange-red, well-defined truss of broad, velvety yellow. Flowers very large, and the immense spread of the individual blooms coupled with its early free-flowering habit makes this Canna noteworthy. 35 cents.

-QUEEN HELEN, or YELLOW KING HUMBERT—Immense flowers that are as large as the Orchid, with flowers Cannas. Color golden-yellow, evenly and distinctly spotted red. This Canna ranks right up with the popular King Humbert. I have no hesi- tancy in saying there is no better Canna grown. 25 cents.

CARNATION PINKS—The Divine Flower

For beauty of flower and color, ease of culture, certainty and freedom of bloom, together with exquisite fragrance, this is well called the "Divine Flower." Plants in the open ground or in pots quickly make large specimens, and when brought indoors in the fall produce an abundance of flowers throughout the entire winter. Carnations bloom expensive; don’t buy them—grow them yourself. Pinch the plant back frequently during the summer season. In the fall bring indoors, place in a four or five-inch pot, keep in a temperature of forty to fifty degrees at night, and they will yield an immense number of flowers with splendid stems, as fine as those sold by florists. If not pinched in they will bloom profusely during the summer. I offer the finest varieties in existence. Your order is incomplete without some Carnations.

OSTRICH PLUME CHRYSANTHEMUMS
25 CENTS EACH; THE TWO FOR 40 CENTS.

LOUIS BOEHMER—A most beautiful shade of lavender-pink.

ANEMONE-FLOWERED CHRYSANTHEMUMS
20 CENTS EACH; THE THREE FOR 50 CENTS.

These beautiful varieties are again very popular for outdoor bedding purposes. They are quite hardy, and with but a slight covering of leaves or coarse stable litter during the winter will take care of themselves after once planted, and produce an abundant, almost lavish, profusion of bloom; and the plants lend a coloration to the garden just at a time when other plants have been destroyed by frost and are looking their worst. Frost does not materially affect the flowering, and it will frequently happen that an armful of their flowers can be cut after a sharp frost.

The blooms last from a month to six weeks, and are borne in immense clusters, almost hiding the plant. The color is bright coral-red, changing to a delicate pink. It past the power of speech to describe it. A wonder.

Fine plants, 50 cents.

MRS. PATTON (New Everblooming Flowering Begonia)—This is undoubtedly the finest blooming variety known. It is of easy culture, low,

bushy habit and flowers are produced the entire year with a wealth of dark pink flowers with yellow stamens. It well merits the name of Everblooming Begonia. This variety is especially suited for florists, being of the Chelatlane type of Begonia and one that can be handled by every one. 35 cents.

MY GRAND GARDEN DAHLIAS

No garden is complete without a show of these brilliant and stately autumn flowers, and nothing gives greater satisfaction for little labor and care, but if stock of these becomes exhausted, will send started plants. I grow and sell fifteen acres of Dahlias each year.

CACTUS DAHLIAS

So-called from their resemblance to Cactus flowers. They are characterized by long, narrow, pointed, tubular and twisted petals of graded lengths, giving the flowers a strikingly attractive appearance and demand for cut flowers. Except where noted, 25c. each; three for 60c.; the entire set of 12 Cactus Dahlias, costing $3.50, loss $1.00.

AMOS PERRY—The best bright scarlet Cactus to date. Color purest flaming scarlet, with long, narrow, twisted petals of irregular formation. The blooms are borne well above the foliage in utmost profusion. Certainly a beauty.

AURORA—Very free flowering; reddish-apricot, suffused with flesh-pink, shading to red at the tips. 50 cents.

CHARLES CLAYTON—The strongest words of praise are not extravagant when applied to this wonderful new Cactus. It is the ideal in color, form, length of stem and general good habit of growth beyond which it would seem little could be hoped for. The color is a most intense crimson, so vivid as to dazzle the eye; superb.

COUNTESS OF LONSDALE—For perfection of bloom, evenness of stem, abundance of flower, this variety has never yet been equaled. On several of the plants 15 flowers counted out of 120 perfect blooms on one plant. Is there any other garden flower that can equal it? The color is a rich salmon-pink, tinted apricot.

FLORODA—Deep dark, rich wine-crimson, splendid shaped flowers on long, upright, wiry stems.

J. H. JACKSON—This is without doubt the finest dark Cactus Dahlia. Its velvety black crimson-marono shade is very good and perfect.

KALIF—(New.) The best red Cactus to date. O. K. in every way. A wonder. 50 cents.

KRIEMHILDE—A most popular cut-flow er variety. Color a brilliant pink, shading to white in the center.

PRINCE OF YELLOWS—One of the best canary-yellows for cutting.

QUEEN OF HEARTS—(New.) The best white Cactus so produced, shaded with white, shading to lemon-yellow at base of petals; very free bloomer.

REINE CAVEAUX—Brilliant Geranium-red; early and free bloomer.

SPRINGFIELD—A new Dahlia of my own introduction. It is identical with Countess of Lonsdale, except in two essentials. It has a darker stem and the flowers instead of being a salmon-pink, as in Lonsdale, in Springfield are a rich amaranthine-red. Its beauty cannot be described. No Dahlia blooms freer, no Dahlia is as pretty as Springfield. It lasts longer cut than any Dahlia I know.

DECORATIVE DAHLIAS

These come next to the Cactus as a cut flower. They are a very showy in the garden, being unusually free bloomers. They are more formal in make-up than the Cactus Dahlias, but not so formal as the Show varieties. They have a unique beauty, being a happy medium between the two. Except where noted, 25 cents each; three for 60 cents; the entire set of fourteen Decorative Dahlias, costing $3.50, loss $1.20.

BLACK BEAUTY—Deep velvety-maroon. The blackest of all Dahlias.

FRANK L. BASSETT—Bright royal purple, shading to brilliant crimson, large, free bloomer.

HORATIANUS PIET—(New.) Salmon-pink, yellowish center; as large as Souv. de G. Doazon. This is taken from many fine varieties of the same size; a Marvel.

JACK ROSE—Magnificent flower with perfect form. Crimson-red, maroon shadings. Named for its counterfeit among roses, the famous "General Jack."

JESSIE—A charming cut-flower variety of a pleasing shade of delicate violet-rose on a lighter ground. A glorious flower.

Different Varieties of Dahlias

MADAME A. LUMIERE—Ground color white, suffused towards the ends of the petals with red, the tips pointed with bright violet-red.

MATCHLESS—Deep crimson, of large size; an early and late bloomer. This I consider one of the best ten Dahlias. Very showy in the garden.

MELODY—One of the finest, being of splendid regular form, with full high center and reflexed outer petals. Color clear canary-yellow, tinting to creamy-white at the tips. 50 cents.

MINA BURGEO—(New.) The best scarlet-red Decorative Dahlia ever introduced. This wonderful Dahlia is a California introduction and is the best of its color. The form is perfect decorative type, the petals being broad and flat; it has a perfectly full center and is a Dahlia that can be grown to an immense size with ordinary treatment. It was very prominent at the Panama-Pacific International Ex position, where it was grown in masses around the Horticultural building. It shows finely under artificial light and for cutting purposes is unsurpassed.

MRS. J. GARDNER CASSATT—A new rose-pink Dahlia that has attracted a great attention. The flowers are of immense size. Said by many to be the finest of all deep pink Dahlias.

MRS. CHARLES SEYBOLD—One of the most beautiful of all Dahlias. A cadmium-red, an inter mingling of red and orange. Very showy.

SOUVENIR DE GUSTAVE DAOZON—This is the largest of all Dahlias. A lovely shade of orange-red. A veritable giant among flowers.

WILLIAM AGNEW—Intense glistening crimson-scarlet, of large size, and gracefully recurving form. The most popular standard red.

ZULU—The blackest of all Dahlias.

ARABELLA—Primrose-yellow, tipped and shaded old rose and lavender; very fine.

DELICE—Its beautiful soft yet lively color a glowing rose-pink, together with its shape, makes it one of the prettiest and most valuable of all Dahlias.

GRAND DUKE ALEXIS—This is one of the most delicately beautiful of all Dahlias. Very large, perfect form, with long, thick quilled petals overlapping at the pink of the outer petals. In freedom of bloom next to the Countess of Lansdale. A magnificent Dahlia.

LUCY FAWCETT—Sulphur-yellow, striped and spotted carmine-rose.

QUEEN VICTORIA—Pure canary-yellow. One of the finest bloomers. Good for cutting.

Growth vigorous, foliage large and attractive. It is one of the easiest to force into bloom during the spring, coming into flower early.

LA LORRAINE—Large flowers; pale rose, turning to carmine. Proven a general favorite during the past two years.

LA FRANCE—Very strong grower, with immense trusses of deeply fringed flowers of a delicate shade of rose.

CENTURY DAHLIAS

This is an entirely new race of Single Dahlias. I consider today that the new Century Dahlias occupy first place where beauty of coloring and artistic effect is desired. One long stem, long stems, long stems, graceful carriage, combined with their purity of color, or the blendings of colors, shades and tints, they entirely outclass all other Dahlias for cut flowers. Keep each variety when cut in a separate vase. Price, 25 cents each; three Century Dahlias, costing 75 cents for 60.

CRIMSON DEEP—Rich, deep velvet-crimson, shaded maroon, with rose halo around yellow disc.

ARKANSAS, October 10, 1920.

Miss Jessie M. Good,

I want to tell you that I had excellent success with the flower seeds I bought from you last spring. I sowed about half of a packet of Coleus seeds and I think I got fifty plants to grow. So many different seed leaves in such bright colors I never saw. I shall be sure to try some more seeds next year. I have eleven nice plants of Chinese Primrose from one packet of seed and to grow them bright this winter. The Aaetatis Grandis is grand indeed. So many people ask what it is, never having seen one before these.

We have had a favorable season and no frost yet. I think I have enjoyed my flowers as never before, to which pleasure you have contributed no small part.

Wishing you continued success and prosperity, I am, Sincerely,

Miss Lillian Sheppard.

I cannot ship Lemons into California or Florida. My New Ponderosa Lemon is what I claim for it. Largest freest-blooming, fruiting and most delicious of all Lemons. Nothing that has ever been brought to my notice in the plant line has caused half the commotion that this wonderful Lemon has. It is 6 feet 6 inches high. The fruit is large and very fine. My plant produces six feet high, no less than eighty-nine of the ponderous Lemons were growing at one time. It was a beautiful sight to see. The tree was blooming, and at the same time had fruit. I have been able to follow the stages of development from the size of a pea up to the ripe fruit, showing it to be a true ever-bearer. Fruit has been taken from this tree as weighing over four pounds. The Lemons have very thin rind for such large fruit. It is the juiciest of all Lemons, makes delicious lemonade, and for culinary purposes cannot be excelled. I have the entire stock of this Ponderosa Lemon, and guarantee the trees to produce the same large fruit. No budding or grafting necessary. Ponderosa Lemon is sure to become popular when it is known. Beautiful Dwarf Ornamental. Oranges cannot be shipped into either California or Florida. This valuable and distinct variety of the Orange family is a dwarf, compact grower, with glossy deep green foliage, which has a decided odor of the Orange Tree of Florida, and is exceedingly floriferous, producing a wonderful profusion of pure white flowers of the most delicious fragrance, identical with the much-sought-for blooms of the Southern Orange groves. Otaheite fruits immediately after flowering, bearing fruit about one-half the size of the ordinary Orange, retaining in a marked degree their sweetness. This unique Orange cannot be equalled as a winter-blooming pot plant for house culture. Requiires but little sunlight, and flowers and fruits when but twelve to fifteen inches high. As a pot plant this lovely dwarf Orange is one of the most novel and beautiful that can be grown. Zebra Plant
A beautiful plant, specially adapted for the decoration of drawing rooms and halls, as it stands dust and drought with impunity, and requires scarcely any water. The leaves are beautifully striped crosswise, with broad white variegations on a green ground. It is a rare and beautiful plant, which should be abundantly grown for positions out of the reach of sunshine, where other plants will not thrive. It can be placed in any position in any room and do well. It has singular beauty for decorative purposes which other plants do not possess, and it is useful both in winter and summer. APANTANICUS—Large and double, with orange-colored flowers.

SINENSIS GIGANTEUS—This is a plant for house cultivation during winter or summer, or for planting outside during summer. It blooms at all times of the year. The plants branch freely and flower profusely, commencing to bloom when not more than two feet high. As a specimen plant for large pots it has an equal claim only in the Brugmansia. Its flowers are of enormous size, often eight to ten inches wide, and of a vivid crimson-red, featuring the most intense scarlet color that they can be seen from a long distance like a flaming torch. They can be wintered over in the greenhouse, or in a well-ventilated room, with perfect safety; and if one does not care to grow them all winter, one should have one or two for summer display.

GRANDIFLORS—Rich, glossy, cut-leaved foliage, littled with scarlet-crimson flower spikes.

SUB-VIOLEACEOUS—Flowers of enormous size, beautiful carmine, tinted with violet. Probably the largest flower of the Hibiscus family, and an unusually free bloomer. I take great pleasure in recommending this fine plant.

HARDY DECIDUOUS SHRUBS

The Ever-Blooming Butterfly Bush
(Buddleya Variabilis Magnifica)
It was a matter of some thought before this highly desirable plant was finally christened with the common English name by which it goes. Several years ago there were imported from Europe some plant novelties, and this one was among them. I observed it carefully for a season and was charmed with its beauty, ease of culture and free-flowering habit. The name Butterfly Bush was applied to it because it seems to attract butterflies in large numbers. Particularly I notice that it is not alone the common little yellow, species of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vying with it in brilliancy of color. This shrub from a young plant set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often maintains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. The year after planting, it generally commences to flower in June and continues each season until severe frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which I mean in some latitudes it will die down to the ground, and while perfectly hardy, I recommend covering the roots with manure, leaves or other suitable materials as winter approaches, as this will produce a heavy growth the following season. This shrub is very desirable as an individual specimen on the lawn and in the garden, or placed promiscuously in the shrubbery border. Fine plants, 35 cents each; three for 65 cents.

Buxus
Ornamental Box—Sempervirens
Useful for edging and bordering walks, etc. A handsome shrub with deep green foliage. This is not as dwarf as the Sempervirens Nana, but I find it so much more vigorous and hardy that I advise planting this and trimming to height required. 20 cents each; six for $1.00.

Calycanthus Floridus
(Carolina Allspice, or Sweet-Scented Shrub.) A most desirable shrub. The wood is fragrant; flowers of a rare chocolate color, having a peculiar agreeable odor that is very intoxicating. They bloom in June and at intervals afterwards. Fine plants, 20 cents each; strong 2-year-old plants, 50 cents.

Cydonia Japonica
(Japan Quince.) Has bright scarlet flowers in great profusion in early spring; one of the best shrubs. Fine plants, 50 cents.

Forsythia Viridissima
A fine hardy shrub. Leaves and bark deep green; flowers golden-yellow. Blooms earliest of all shrubs before the foliage comes. 25 cents; 2-year size, 50 cents.

**Hydrangea Paniculata Grandiflora**

A great favorite, and there is nothing finer or more showy, whether for planting in large masses in parks or for single plants on the smallest lawns. Blooms profusely from late in the month of July until the latest frost, in immense white panicles, tinted with pink and then with brown in the fully matured flower. The plant should be cut back early in fall, leaving one-half of the past season's growth, as the flowers are much finer if the plant is treated in this manner. The flowers are much finer and larger if grown in a sheltered, rich soil, but the plant is so hardy and so easily grown that success is almost certain in any kind of soil and in any situation. Young plants, **25 cents; strong flowering plants, for immediate effect, 2 years old, 60 cents.**

**New Hydrangea “Hills of Snow”**

This is the great new hardy shrub that has come to gladden our yards and gardens. I place it first and foremost of all shrubs. It makes a perfectly round, symmetrical bush that is covered from June to August with handsome large pure white flowers. Be sure to plant this new hardy shrub; it will please you greatly. Young plants, **25 cents each; strong 2-year-old plants, 60 cents.**

**Plicatum, Japanese Snowball**

Handsome plicated leaves with globular heads of pure white flowers, early in June. No shrub is prettier. **75 cents.**

**Snowball—Viburnum**

(Viburnum Opulus Sterilis.) (Guelder Rose.) A well-known favorite shrub of large size, with globular clusters of pure white flowers. The Snowball of our mothers' gardens. Blooms in May. **One-year plants, 35 cents; 2-year plants, 60 cents.**

**Rhus Cotinus**

(Purple Fringe or Smoke Tree)

A much-admired shrub for its curious fringe or hair-like flowers that cover the entire plant, giving it the appearance of being enveloped in smoke. **50 cents.**

**Syringa or Lilac**

Well-known beautiful shrubs, indispensable in every collection. It is doubtful if anything in the whole range of flowering shrubs surpasses these in grace and elegance, or in hardness and usefulness. As decorative plants on the lawn or in the border they are without a peer. All of the Lilacs are deliciously fragrant. One-year plants of Lilacs, 22 to 18 inches high, 40 cents each; 2-year plants, branched, 18 to 24 inches, 76 cents each; any nine Lilacs, in 1-year-old plants, for **$3.00;** in 2-year-old plants, any nine for **$6.00.**

**ALPHONSE LAVALLE—**Double dark blue, shading to violet. Extra large panicles, beautiful. **CHARLES X**—A strong, rapidly-growing variety with large, shining leaves; trusses large, rather loose; reddish-purple. **DR. STOCKHART—**Single wine-red; fine trusses. **JOSIKAE** (Hungarian Lilac)—Fine, distinct species; dark, shining leaves and purple flowers in June after all the other Lilacs are done flowering. Extra fine.

**MADAME CASIMIR PERIER—**Very large, creamy-white; superb.

**MADAME LEMOINE—**A superb double-flowering white variety; can't be beat. **MARIE LEGRAYE—**Large panicles of single white flowers. The finest white Lilac.

**MICHAEL BUCHNER**—Very large, erect panicles of pale lilac; superb.

These are beautiful shrubs of the easiest culture. Their blooming extends over a period of three months. One-year plants, 25 cents; strong 2-year-old plants, 50 cents.

ANTHONY WATERER—This beautiful gem makes a low, compact bush and is covered nearly the whole growing season with large umbels of deep crimson flowers which measure nearly a foot across. When scarcely three inches high it begins to bloom, and thereafter is seldom out of flower. As a pot plant or for growing in the open ground, nothing can equal it.

VAN HOITIE (Bridal Wreath)—Without doubt the very finest of all shrubs. With me in May and early June the plant is completely covered with mats of large white flowers presenting a beautiful appearance. Named the "Bridal Wreath" on account of its long, graceful sprays of pure white.

Kerria Japonica (Corchorus)

A slender green-branched shrub with globular yellow flowers from July to October; fine plants. 25 cents.

Lonicera Grandiflora

(Upright or Bush Honeysuckle.) A beautiful shrub, producing large, bright red flowers striped with white; blooms in June. 25 cents.

"Bridal Wreath" Spirea

Lonicera Tartarica

(Tartarian Honeysuckle.) This Honeysuckle also grows in a bush form, bearing beautiful pink flowers which contrast beautifully when planted with Grandiflora, blooming at the same time. 25 cents.

They produce in June and July superb large trumpet-shaped flowers that almost hide the plant. They are very desirable for the border or for grouping and as specimens on the lawn. One-year plants, 55 cents; strong 2-year plants, 60 cents.

CANDIDA—A vigorous, erect grower; flowers pure white and produced in great profusion in June, and the plants continue to bloom through the summer, even until autumn.

HEDGE PLANTS

I Here Name the Most Suitable Plants for Hedges

Ligustrum—Privet

AMOOR RIVER PRIVET (Amurense)—This is a very graceful plant; requires little trimming. The leaf is small and rounded, plant branching, has no spines. A plant that the California Privet has. This is the Amoor River Privet from the north, and is hardy. 18 to 24 inches, 20 cents; $2.00 per dozen; $15.00 per hundred.

CALIFORNIA PRIVET OVATIFOLIUM—This makes when pruned a very formal hedge; will grow almost anywhere, thriving where other plants re- fuse to grow. 18 to 24 inches, 20 cents; $2.00 per dozen; $15.00 per hundred.

Berberis—Barberry

(Thunbergii.) From Japan. A pretty species of dwarf habit. Small foliage changing to a beautiful coppery-red in autumn. A slower grower than the Privets, but needs no trimming and is a fast for the eye when full grown. One-year plants, 25 cents; $2.75 per dozen; $20.00 per hundred.
CHOICE
FLOWER
SEEDS

The letter A, B or P following the name of the variety signifies whether the seed is an Annual, Biennial or Perennial. Annuals bloom the first year from seed and die; Biennials bloom the second year from seed and die; although many Biennials, such as Aquilegias, Foxglove, Canterbury Bells, and others, from their habit of seeding themselves, are practically Perennials. Perennials do not all bloom the first year from seed. In vigor and bloom they increase for several years until their full beauty is reached. Nearly all seeds of Perennials are slow of germination, and should be planted in some quiet spot, where they may be kept moist and undisturbed for several months, before transplanting to the permanent bed.

DAISY COLLECTION

No flowers are so graceful for cut-flower work as those of the Daisy form. In the group named below are my own superb Alaska, or Shasta Daisy, and two from South Africa—Arctotis Grandis, and the Dimorphotheca hybrids; the latter two, so splendid and so little known, are as magnificent as the well-known Shasta Daisy.

As you are perhaps aware, all the plants we know as Daisies belong to the Chrysanthemum family, a widely scattered but tolerably distinct family. I have added others, that do not belong to the Daisy tribe, adding them for their color and flat-petaled form, their long stems and grace; these are the Cosmos, Gaillardia, and Coreopsis.

All these flowers are well-known to me, and I have grown them in my own garden, and because I can always gather a vase of graceful, clear-toned flowers for my table, it occurred to me that others might like to know of these for their own gardens.

Agatha Coelestis
Exquisite sky-blue; requires a sheltered position, tender, but will bloom all winter if lifted and potted in the fall; not so long-stemmed as the other Daisies, but chosen for its delightful color. Pkt. 5 cents.

Anthemis Kelwayi
Golden Marguerite. Deep golden; blooms from midsummer until frost; perfectly hardy. Pkt. 5 cents.

Arctotis Grandis
South African Daisy. Blooms very large; petals bluish-white above, petals below purple under side. Half hardy annual; one or two plants will supply hundreds of blooms. Flowers until hard freezing. Pkt. 5 cents.

Coreopsis Grandiflora
Clear, pure yellow; blooms early, and if cut back will give scattered blooms all season. Pkt. 5 cents.

Cosmos—Giant-Flowered Hybrids
There are two varieties of Cosmos—the tall late blooming, and the semi-tall early. I offer only the choicest large-flowered Lady Lenox hybrids in mixed colors.

Cosmos—Tall, late flowered. Pkt. 5 cents.

Cosmos—Early, semi-tall hybrids. Pkt. 5 cents.

Daisy, Alaska
This is the true Shasta Daisy, the Burbank hybrids, than which no finer can be bought. Hardy as an oak, grows finer each year. I have had them in inches in diameter with stems three feet long. Petals rich, heavy; blooms sometimes come semi-double, sometimes with exquisitely quilled hearts. Pkt. 15 cents.

Dimorphotheca Aurantiaca Hybrids
This is declared to be the greatest acquisition to the cut-flower florist and to the garden made within the last thirty years. Annuals where deep freezing occurs; will bloom all winter in the house if treated early; are winter bloomers in Southern California; they are all-round grand flowers and must be grown to be appreciated. Colors range from orange, through yellow, salmon, pink, white and bluish-white; flowers three to four inches across. Pkt. 5 cents.

Gaillardia Grandiflora
The well-known h’d’y perennial. One of the standbys of the garden and for cut-flower work. Large flowers of rich mahogany-red zoned with yellow and lighter red. Try them in your brown Japanese basket. Pkt. 5 cents.

Pyrethrums
All the Pyrethrums are so variable in their coloring that only mixed seed may be offered. Blooms from mid-May to late July. Colors, white, pink, scarlet, deep red. They bloom in unbelievable masses; are fine for cutting and the showiest plant for the garden I know of. True Daisies. Pkt. 5 cents.

SPECIAL OFFER
The above collection of ten packets of seed, costing 60 cents, sent to you for only 40 cents. This offer is net, and is not to be included when selecting premium.
